Data Display for Assignment 2

A/Prof Shiyang Tang

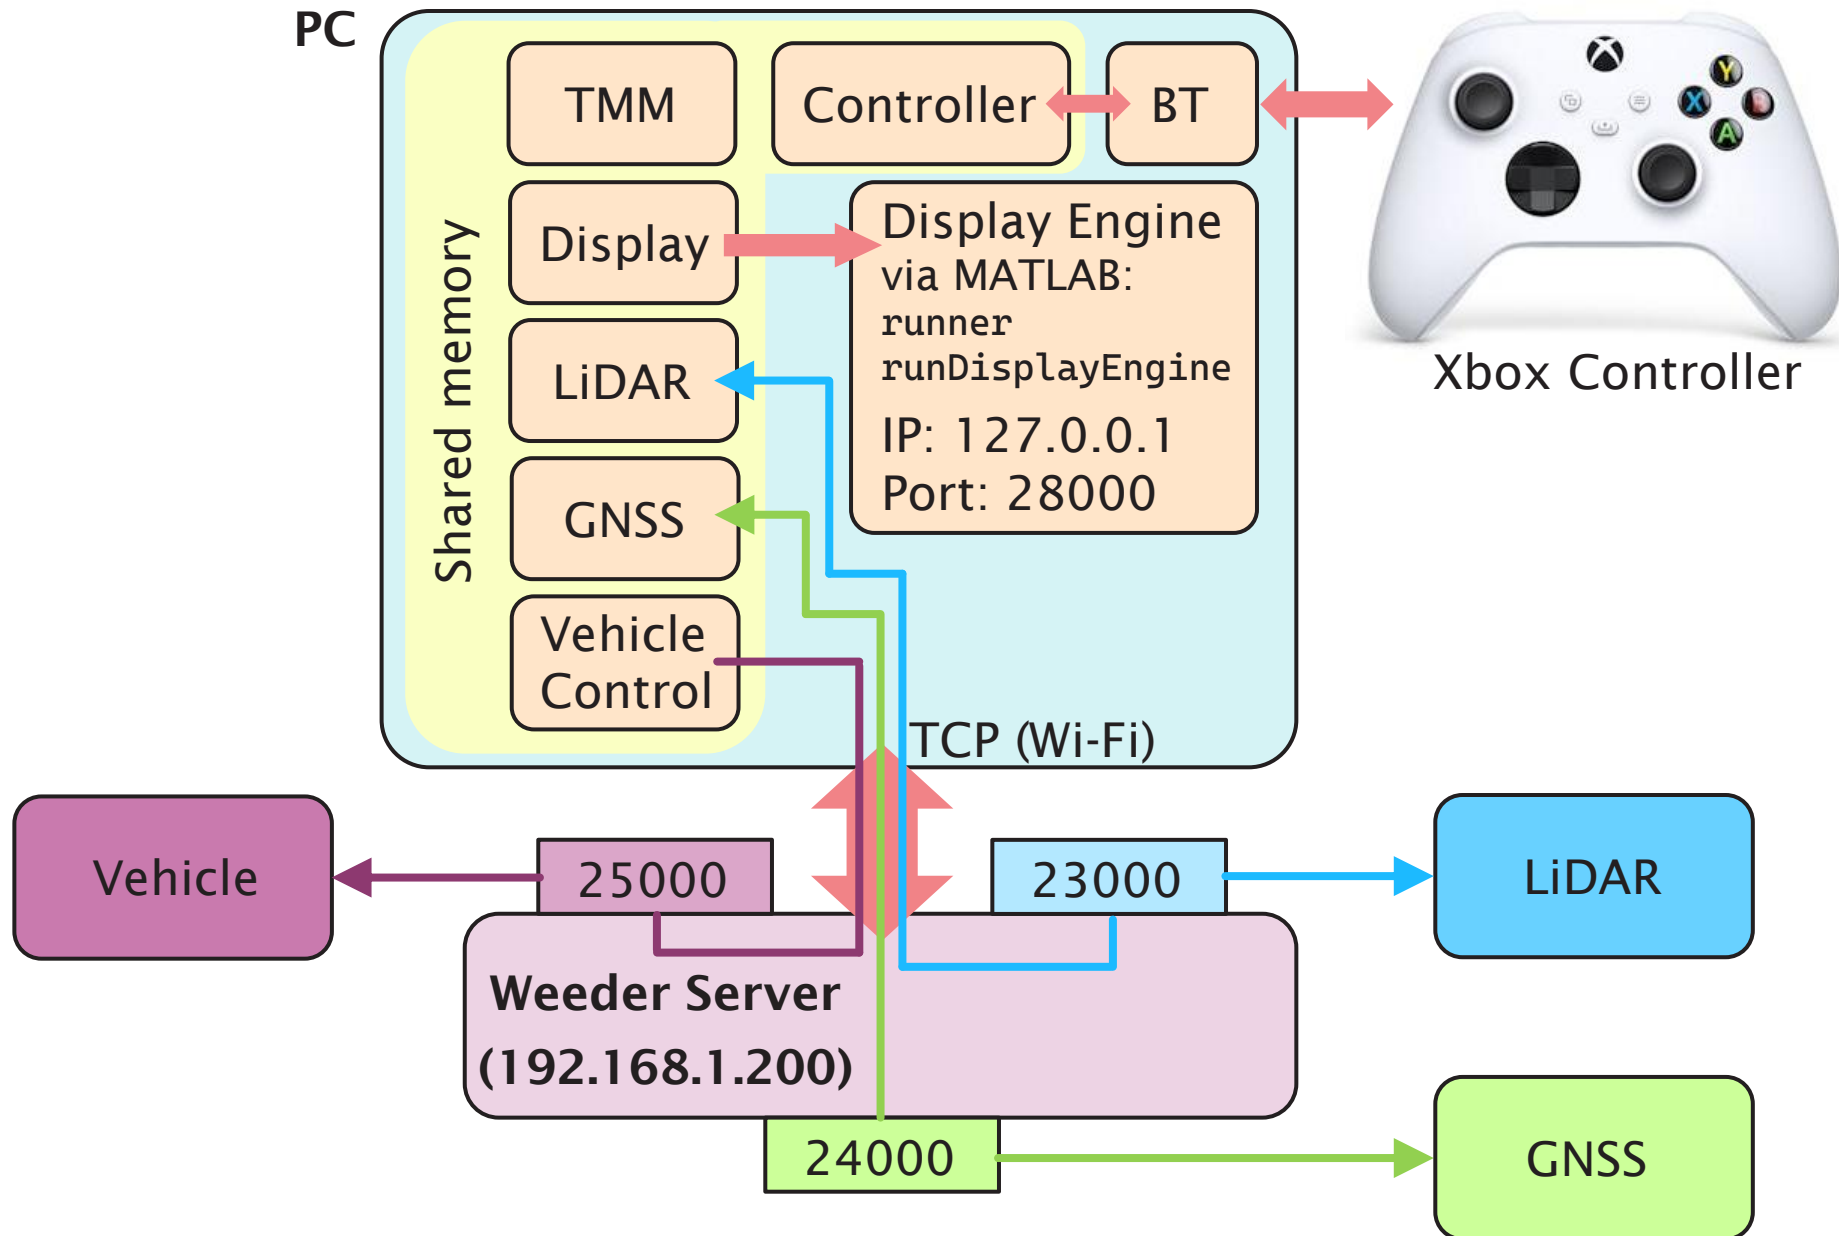

MTRN3500

Computing Applications in Mechatronics Systems

Software Architecture

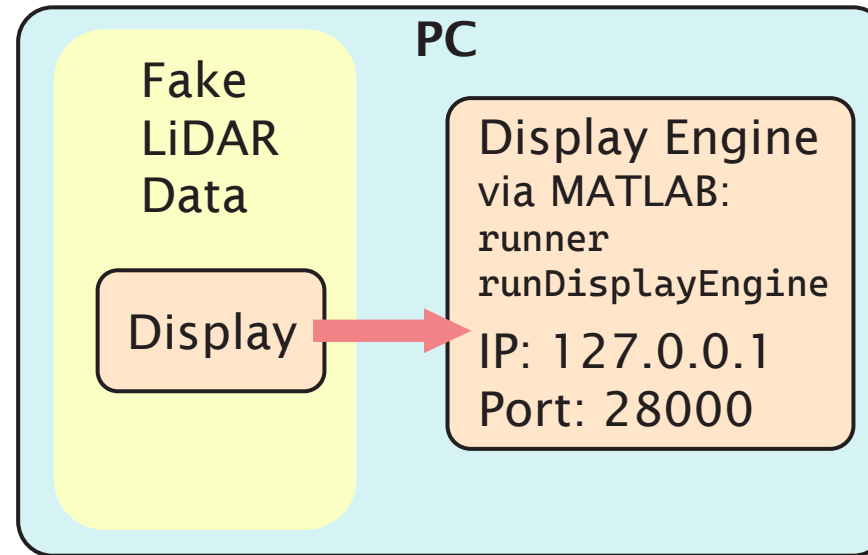

Communication Architecture

Appendix 1: Display Examples

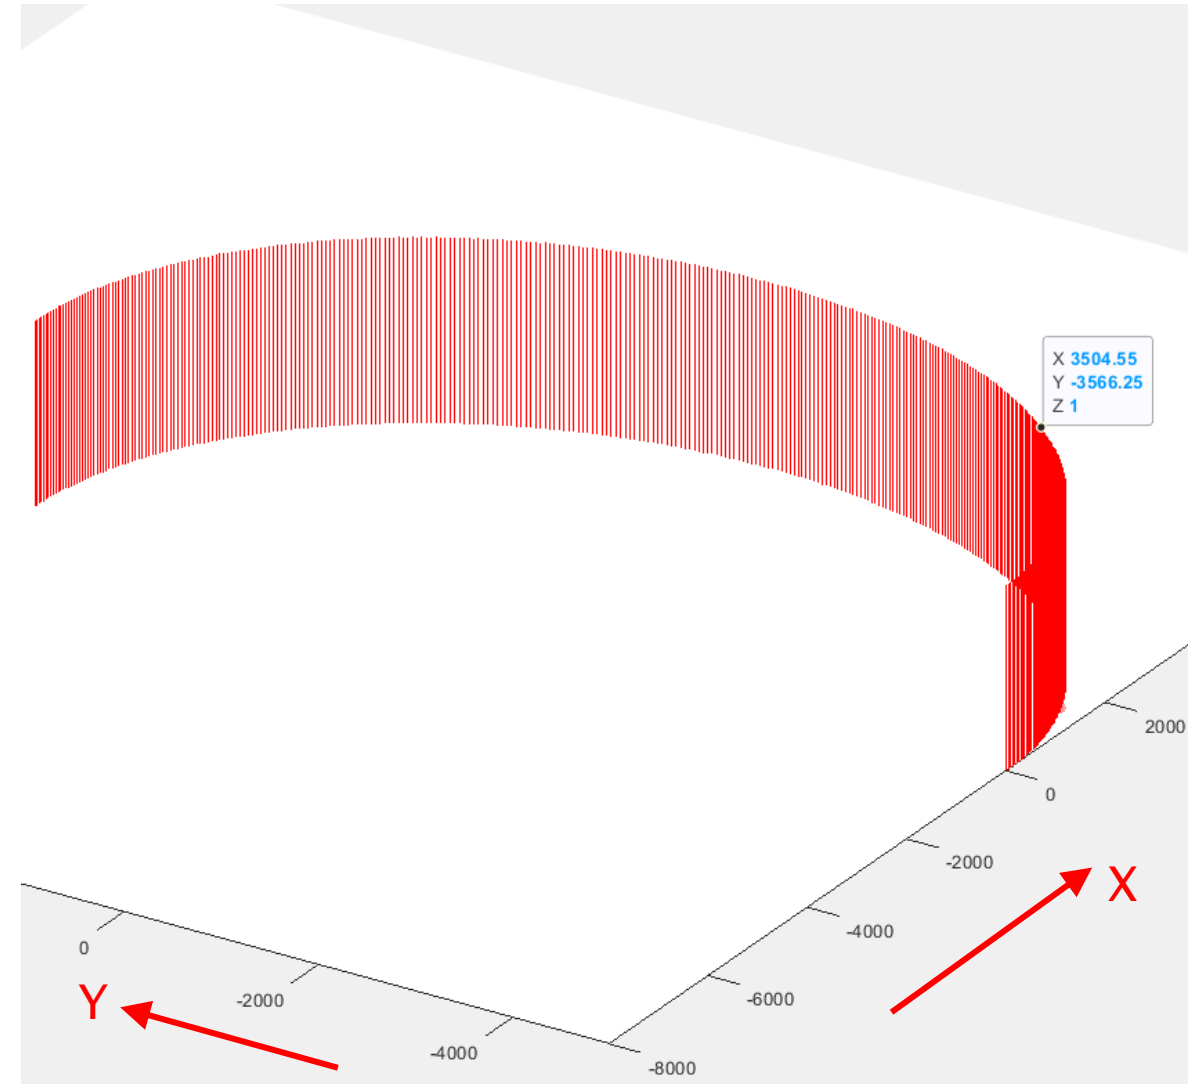

Example 1

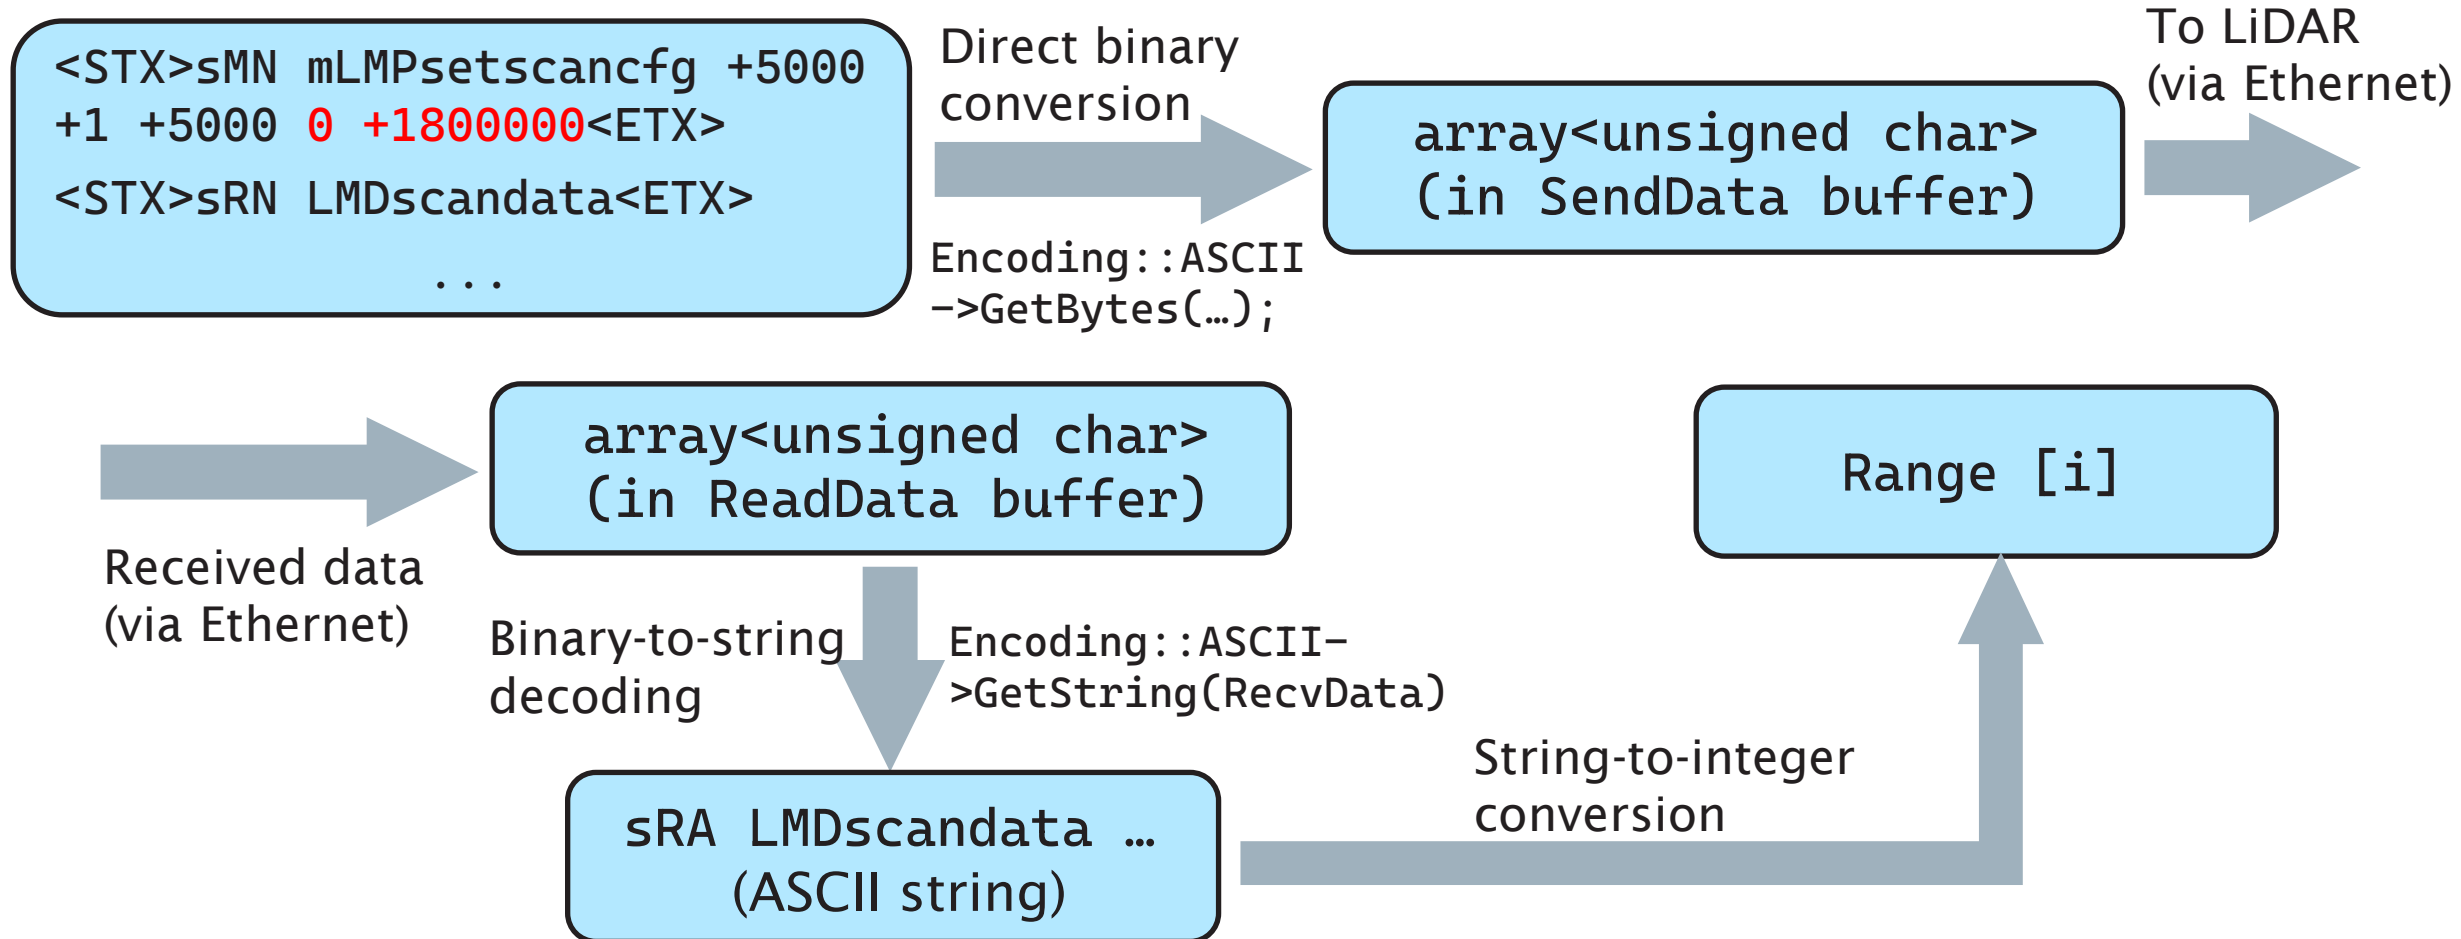

Example 2

Appendix 2: LiDAR Coordinates

Appendix 3: LiDAR Data Communication

Request:

<STX>sMN{SPC}LMCstartmeas<ETX>

HEX string:

02 73 4D 4E 20 4C 4D 43 73 74 61 72 74 6D 65 61 73 03

Answer:

<STX>sAN{SPC}LMCstartmeas{SPC}0<ETX>

HEX string:

02 73 41 4E 20 4C 4D 43 73 74 61 72 74 6D 65 61 73 20 30 03

Appendix 4: LMS151 Configurations

- **Select user level (sMN SetAccessMode 03 F4724744)**

User level	Password	Hash value
Maintenance personnel	main	B21ACE26h
Authorised client	client	F4724744h

Tab. 30: Hash values of the passwords

Request

Message structure: **sMN SetAccessMode** User level password

Message part	Description	Variable type	Length (byte)	Value range
Type of command	Request (SOPAS method by name)	string	3	sMN
Command	Select user level	string	12	SetAccessMode
User level	A valid user level must be included in the transmission. Otherwise the LMS declines the command.	int_8	1	02h maintenance personnel 03h authorised client 04h service
Password	E.g. encoded value for “client”	uint_32	4	00000000h ... FFFFFFFFh

Appendix 4: LMS151 Configurations

➤ Scan configuration setup (sMN mLMPsetscancfg +5000 +1 +5000 +0 +1800000)

Message part	Description	Variable type	Length (byte)	Value range	
Type of command	Request (SOPAS method by name)	string	3	sMN	
Command	Configuration of scanning frequency and angular resolution	string	14	mLMPsetscancfg	
ScanningFrequency	Information in 1/100 Hz, the transmitted value can be 25 Hz or 50 Hz.	uint_32	4	2,500	25 Hz ... 5,000 50 Hz
NumberSegments	For the LMS100 always 1	uint_16	2	1	1 segment
AngleResolution	Information in 1/10.000 degrees, the transmitted value can be 0.25° or 0.5°	uint_32	4	2,500	0.25° ... 5,000 0.5°
Starting angle	Not currently possible, in future information in 1/10,000 degree	int_32	4	-450,000 ... +2,250,000	
StoppingAngle	Not currently possible, in future information in 1/10,000 degree	int_32	4	-450,000 ... +2,250,000	

Appendix 4: LMS151 Configurations

- Configure scan data output (sWN LMDscandatacfg 01 00 0 0 0 00 00 0 0 0 0 +1)

Field	Meaning	Value	Explanation
OutputChannel	Select channels	01	Channel 1 (DIST1 only)
Remission	Output intensity (RSSI)	00	Disable RSSI
Resolution	RSSI resolution	0	Ignored (RSSI disabled)
Unit	Unit of remission	0	Ignored
Encoder	Output encoder data	00	Disable
Reserved/legacy field	Not used in LMS151	0	
Position	Output position	0	Disable
DeviceName	Output device name	0	Disable
Comment	Output comment	0	Disable
Time	Output timestamp	0	Disable
Reserved	Future extension slot	0	
Output interval	Output every scan	+1	Every scan
